**Request for Proposals
Hillside Woods & Park Restoration Project Management
and Other Landscaping & Horticultural Services
Addendum No. 2
April 26, 2023**

This addendum provides direct responses to questions received.

1. Can you provide the EpiCollect5 data?
 - a. The EpiCollect5 data can be found [HERE](#)
2. Will the bid date be adjusted by the 3-day difference from the previously scheduled 4/20/23 addendum delivery date?
 - a. The bid due date will be extended to May 5, 2023 at 10:00am.
3. The RFP requests "Effective deer removal from enclosure area, along with on-going deer management recommendations"; however, there appear to be no recommendations in the Management Plan document other than installation of exclusion fencing (separate RFP as noted) and immunocontraception (appears to be separate ongoing work). Could you please clarify what "effective deer removal" means, and if there are any desired management practices not notated in the Management Plan?
 - a. The Village has preference for humane removal (i.e. no culling), to remove the deer from the exclosed area. The Village is looking for best recommendations to remove the deer from the exclosed area. A collaborative effort with Village staff and community volunteers under the direction of the successful proposer is anticipated.
4. Will the fencing be installed prior to, or concurrently with, this vegetation management contract?
 - a. The fencing installation work has begun. There will be overlap with the vegetation management work.
