MARINE ENGINEERING CONSULTANT FOR SHORELINE EROSION REMEDIES IN MACEACHRON PARK IN THE VILLAGE OF HASTINGS-ON-HUDSON

July 29, 2021

Addendum #1

Questions:

1. Experience: In the Experience section of the RFP it is noted that “certification as a coastal engineer by the Academy of Coastal, Ocean, Port, and Navigation Engineers (ACOPNE) is required.” Due to the extremely limited number of qualifying firms in the region, would the Village accept similar experience in lieu of this certification. Specifically:

- Master’s Degree in Coastal Engineering Discipline
- NY Professional Engineers License
- 12 years of experience (including 8 following issuance of first P.E. License) in the specific area of waterfront and coastal engineering

2. Budget: Can the Village share the available budget for the Scope of Work identified within the RFP?

Responses:

1. the Village will consider all relevant experience in selecting the winning proposal.
2. The Village has received a grant in the amount of \$50,000 which has a 15% match.
