RE: Pre-Design Investigation Data Summary  
Report Amendment – Appendix B  
Current Groundwater Model  
Harbor at Hastings Site #360022

Dear Mr. Johnson:

The Department of Environmental Conservation and the Department of Health (Departments) have reviewed the supplement to Appendix B of the Preliminary Design Report submitted on February 8, 2019. This supplement provides the current groundwater model for the Harbor at Hastings site. This will be used to evaluate the two sheet pile wall options within the Hudson River designed to provide containment and allow for the potential recovery of PCB DNAPL offshore of the northwest corner of the site.

The Departments find the updated groundwater flow model acceptable to move forward with the remedial design for the site. If you have any questions, please feel free to contact me at (518)402-9821.

Sincerely,

Jessica LaClair  
Project Manager  
Bureau D, Section A  
Division of Environmental Remediation
