**RE: Supplemental Northwest Corner Investigation Work Plan  
Former Anaconda Wire and Cable Plant Site, Hastings-on-Hudson, NY  
NYSDEC Site # 3-60-022**

Dear Mr. Heitzman:

Atlantic Richfield Company (AR) is providing the enclosed work plan in response to NYSDEC's letter of November 7, 2006. This work plan is based in part on our current understanding of the material we have recovered from MW-12 in field events in November 2006 and January 2007. We recommend the field investigation be carried out in phases beginning with the land phase (Phase 1) and then, after evaluating the results from that work, apply those learnings and finalize the water phases (Phases 2 and 3) of the investigation.

Please call me with any comments or questions, or if you would like to set up a technical meeting to discuss the field work.

Sincerely,

David V. Kalet
