RFP Professional Land Surveying Services

Question:

Subject: RFP - Professional Land Surveying Services @ Main Street – Questions

Good Morning,

We would like to pose the following questions for the RFP Professional land Surveying Services on Main Street in the Village of Hastings-on-Hudson.

- Does the Village have a specific Horizontal/Vertical coordinate system that must be used for this project?
- What quality level must be used for the underground utilities?
 - QLB (markout)
 - QLC (drafting utilities from records)
- Is the surveyor responsible for individual Lot Lines, or just the right-of-way lines?
- The RFP states that property line records will need to be researched by the surveyor, and only tax maps will be provided. FOIL requests can take up to 20 business days, and the RFP specifically states that the project must be completed within 30 days of a NTP. Will the Village aid in speeding up FOIL requests for property data documents?

Much appreciated!

Answer: Answers are in order of same bulleted questions.

- The consultant should list the coordinate system they would like to use in their proposal.
- Quality Level:
 - QLB: As listed in the RFP, any visible utilities should be picked up in the field.
 - QLC: As listed in the RFP, the surveyor will be required to coordinate directly with the appropriate utility companies to have the existing utilities marked out.
- As stated in the title and the scope of work this is a Right of Way survey.
- Yes, the Village will provide aid in speeding up FOIL requests for property data documents.
