Re: Former Anaconda Plant (a.k.a. Harbor at Hastings Site) Site No. 3-60-022
Hastings-On-Hudson, New York

Dear Mr. Johnson:

The Department of Environmental Conservation ("Department") had a conference call with representatives of the Village of Hastings ("Village") on September 14, 2021. During the call the Village expressed some of their concerns regarding the remedial project for the Harbor at Hastings site. The Department has a few requests of BP listed below:

- Provide the Village modeling which includes the entire shoreline and Kinnally Cove. The modeling should include, but not be limited to, wave action, a smaller grid than previously supplied, and a more precise shoreline that accurately reflects existing conditions.
- Provide the Village any additional information, evaluations, and design elements as they are completed for review prior to the submission of the 95% Final Design.

In an effort to keep the project moving forward please consider the above requests. If you have any questions, contact me at (518)402-9821.

Sincerely,

Jess LaClair
Project Manager

Department of
Environmental
Conservation
